WORK EXPERIENCE

System Developer & Digital Support | S&K House

2026 – Present

- Designed and developed a fully automated POS and payroll management system using Java and SQL, streamlining business operations and eliminating manual processing.
- Built an automatic paysheet generation module, reducing monthly payroll processing time significantly.
- Managed the company's social media platforms and digital content strategy, improving online presence.
- Provided ongoing support for internal digital systems and implemented workflow improvements.

Technical Developer — Crypto & Forex Analytics Platform | Independent Project

2026

- Developed a web-based technical analysis platform providing real-time buy/sell signals for Cryptocurrency and Forex markets.
- Built and integrated an AI agent that aggregates live market news and generates trade signals based on 8 proprietary trading strategies.
- Validated signal accuracy across 20+ live trade evaluations, demonstrating consistent strategy performance.

IT & Systems Support | S&K House

2025

- Set up and maintained all computer systems, improving day-to-day operational efficiency.
- Managed and updated the company website, ensuring it remained current and functional.
- Provided technical troubleshooting and end-user system support across the business.

Web Developer | COOFANDY Clothing Store University Project

2024

- Developed and enhanced the company's e-commerce website, improving functionality and visual design.
- Optimized website performance including load speed, mobile responsiveness, and security hardening.
